

## The three R's

### Reuse, Reduce, Recycle

In Malta we are improving on recycling but we have to work even more. If we don't work for this planet someday we are going to lose it. One way of doing is by recycling, this way we are decreasing the amount of waste and material that gets used. We have to make it even easier for people that don't recycle. The society has to give recycling more importance. One way of doing this is to have more talks with children in schools and to provide more bring-in sights. Every locality in Malta has to have at least five bring-in sights located at the most visited parts in town. In my opinion we don't work for a better environment but we have to be more conscience on what we are doing because ***we are killing the Earth.***
