Clean Up Day.

On Monday 6th March my class and students from form 4 went on an outing. This outing was unusual because we went on a Clean Up Day.

We went to Pembroke near the football ground. When we arrived the person that is in charge of the activity talked to us. Then we were divided in groups. Each group had some garbage bags and some rubbish pickers. The garbage bags were of plastic, general rubbish, metal and paper. Every person carried one of these bags. Each group had a teacher to take care of the group.

While we were working Miss Eco Malta joined us. She helped us collecting the rubbish. After some time we took a short break. When we cleaned all the area, we tied the bags, we weighed the rubbish and the result was 144 kilos.

Then the Minister Jose Herrera arrived and some students asked him some questions. He replied to all the questions. A group of other students interviewed the person in charge and Miss Eco Malta.

I learned a lot from this experience and I had a lot of fun in this outing.
