

## **RECYCLE THE PRESENT, SAVE THE FUTURE!**

The number of tourists visiting Malta is increasing. Undeniably, tourism is very beneficial to Malta's economy, but it can also be damaging since it can negatively impact the environment.

Tourism can negatively impact the environment through littering. Littering not only affects Malta's appearance, but it can also affect Malta's natural elements.

Litter is bad. Besides polluting the environment, creating eyesores and harming many species of insects and animal habitats, litter can also lead to the introduction of unwanted and unhygienic rodents to flourish! This means that waste can be toxic if not properly disposed.

Thus, it is very important not to litter and to dispose waste in appropriate bins and containers. We should also learn to reduce, reuse and recycle as much as possible to reduce waste and thus, save the future.

We should improve our mindset and be more responsible!
