

Poem by student: Chanise Mifsud – 9.2
School: SMC Senior Secondary School, Verdala, Cospicua.

Pollution

It's very easy, as you can see
The air pollution ends up in the sea
There are a lot of bring-in-sites
So why throw your waste out of sight?

So, you can make earth day everyday
And separate things you're throwing away,
Don't waste water, turn off the light
And for sure your future will be so bright.

Pollution can harm animals and plants
So, it's your job to protect the environment;
So, we recycle material in just one place,
So, you find it handy, not too much space.

You can help by reduce, reuse, recycle,
And make this a part of your daily cycle.
For all that you did and you're trying to do,
The sea and earth will finally thank you!
