

ARE YOU PART OF THE SOLUTION OR THE POLLUTION?

Reported by Jayden Sammut

Malta News Correspondent

Littering in Malta is a disease which continues to harm the environment. Littering ranges from the road side plastic bottles to the overflowing dustbins.

Littering is caused by carelessness from people and even because people think about their money instead of the environment. The consequences of littering can be devastating. Littering can cause injuries because people may get physically hurt and may cause deadly disease. One can give a helping hand by making school projects and organize more littering awareness campaigns. In an interview with Cami Appelgren the Founder of Malta Clean Up said that

ARE YOU PART OF THE SOLUTION OR THE POLLUTION?

“There is no quality assurance as there are so many bins not being used and too few bins in overflowing areas”.
